Credit score

- A number ranging from 300-850
- It represents a person's creditworthiness
- Higher the number, more the creditworthiness
- Used to evaluate potential risk in lending money to lenders
- Calculated and maintained by CIBIL in India
- Adopted by banks and credit card companies

CHALLENGES TO FACE

- Inclusion of alternative payment of contractual agreements
- Provide access to credit score for free
- Create awareness to encourage financial discipline
- Provide live credit score
- Provide information about benefits and perks

Proposed iDEAS

- General usage...
 - Billing (offline & registered online shops)
 - Tracking consumer usages
- Governmental billing
- Non – Governmental Billing
- Through consumers Social Contacts

General Usages:

Billing:

- Registered Online Shops

Tip

Remember. These shops are capable of using this facility...

– How the online registered billing works!

Portal which is provided by CIBIL Department

Consumer making an order

A screenshot of a software application titled "Infinity Jewellery Version 3.008". The interface shows a "Gold Sales Bill" form. It includes fields for Date (12/04/2007), Branch (SS), Location (Gold Counter), Name (XXX XXX XXXX), Address (XXX XXXXX, XXX XXXXX), and PIN (XXXXXX). Below these are tables for "Amount", "Type", "Description", "Rate", "Gross Wt", "Net Wt", "Making", and "Amount". The "Amount" table shows a total of 40000.00. The "Gross Wt" table shows a total of 10.260. The "Net Wt" table shows a total of 10.260. The "Making" table shows a total of 821.00. The "Amount" table shows a total of 97778.00. At the bottom, there are fields for "Type" (1. Consumer), "Card Type" (1. Cash), "Charges" (A. Charges), "Card No." (S. Cash Voucher No.), "Aadhar No." (S. Aadhar No.), and "Sales Station" (S. Sales Station).

Bills are added to the consumer aadhar database

CIBIL Department unique bill provided for the shopkeeper with their unique shop ID.

Offline Billing

Consumer can later update his/her bills through online portal or submitting it to the nearby office.

FORMULA

$$(+ \text{ or } -) ((\text{sub percentage}) * (\text{category percentage}) * 850) \bmod (\text{sub percentage})$$

CHANGES MADE IN CREDIT SCORE CALCULATION

Then

Now

From

IDEA

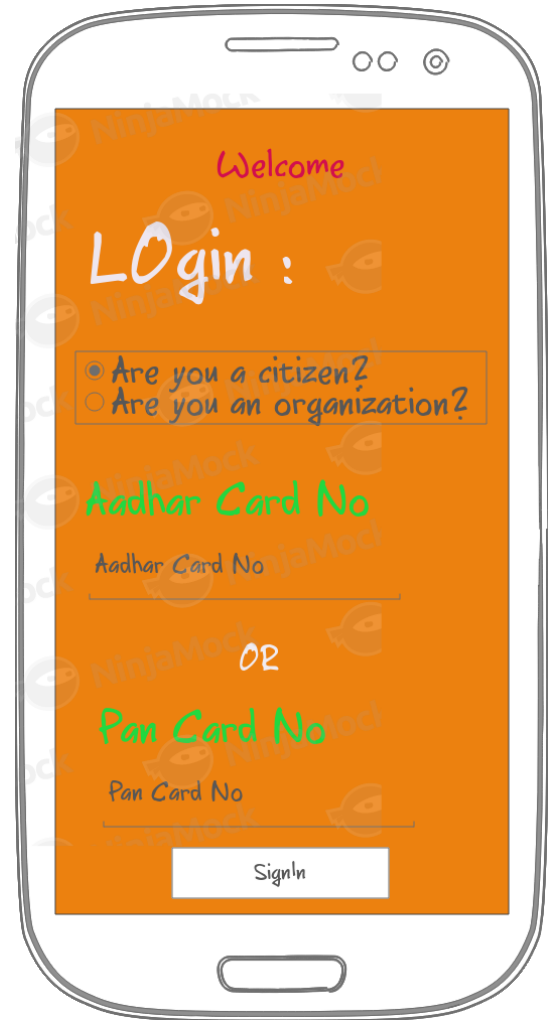

to

IMPLEMENTATION

– Registration/Login

- Registration: We have 2 options:
 - ✓ Are you a citizen? (asked for AADHAR NO & PAN NO)
 - ✓ Are you an organization? (asked for PAN NO)
- Verification
- User will be logged out automatically, everytime when comes out of the app/ idle for a specific amount of time
- Registered User can login with the username and password .

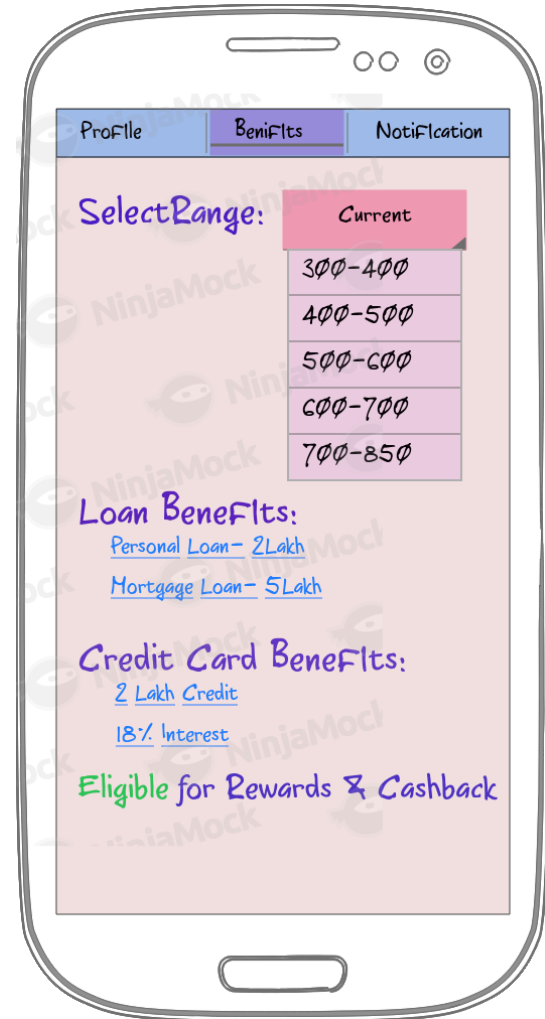

-Track Credit Score

- User can view their current credit score.
- Live News Feed

- Benefits

- It will display the benefits that the user is liable to other resources.
- **Loan Benefits:**
 - ✓ Personal Loan
 - ✓ Vehicle Loan
 - ✓ Mortgage Loan, etc...
- **Credit Card Benefits**
 - ✓ How much amount of credit that the user can get it through credit card
 - ✓ How much interest you have to pay for the credit card
- **Rewards & cashback**

Prediction

- In order to judge their future credit score
- User also will be given some advice based on the prediction made

- Other Features

- **Profile:** Here user can view or change their username & password.
- **Notification:** User will receive a push up notification for payment before due date if applicable or any general awareness that needs to be intimated to the user

Future Enhancements

- Using the user's PAN NO, all account details of different banks pertaining to that user can be tracked using this app
- Offline payments for Non – Governmental transaction, for those people who feel insecure to make online transactions
